Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

I. Rejection of claims under 35 USC 112, 2nd paragraph will not be maintained in light of amendment filed 7/19/04. Applicant is correct in that “incapacitating agent” is defined on pages 1 and 12 of the instant specification.

II. Rejection of claims under 35 USC 103(a) as being obvious over Ohara will not be maintained in light of amendment filed 11/17/04. Applicant has amended claim 2 to claim propylene glycol dicaprylate / caprate as a limitation.

Applicant’s arguments filed 11/17/04, with respect to the rejection(s) of claim(s) under 103(a) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made below.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-7,9-11,48,49 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ohara et al (JP 2000204046; 7/25/00) and Buseman et al (US2002/0192273; 12/19/02). Ohara teaches a liquid composition comprising nonylic acid vanillylamide (incapacitating agent), glyceryl tri(2-ethylhexanoate) plus fatty acid polyalcohol esters. Ohara teaches that the composition is used to treat itching. Ohara does not teach the composition comprising propylene glycol dicaprylate / caprate. However, Buseman teaches an anti-itching composition comprising propylene glycol dicaprylate / caprate . It would have been obvious to one having ordinary skill

Art Unit: 1616

in the art to modify the invention taught by Ohara to include the propylene glycol dicaprylate / caprate taught by Buseman. One having ordinary skill in the art would have been motivated to do this since both compositions are used individually to treat itching. With respect to the instant amounts of ingredients, one having ordinary skill in the art would have been motivated to determine the optimum amounts of ingredients. One would have been motivated to do this in order to develop a composition that would have been most effective.
